PROJECTS

ACADEMIC PROJECTS

GMART(Degree Project)

Nov 2018 – April 2019

- Developed a website in Core PHP and other Front End Technology HTML, CSS, JAVASCRIPT.
- This website for Garment Company to sell their products related to Indian garment products. Distributors are no need to travelling to different city or state and Shopkeepers shows and purchase products though our website.
- In our website Company, Distributors, Shopkeepers are connected though each other
- The main purpose of our project is save cost behind distributors, save time which are wasted in distribution process on distributors.
- In our project we have three members any my role is front-end developers.

OTHER PROJECTS

ArtMart

- An online Art Gallery Management System in Java (JSP, Servlet, JDBC) and using MySQL database.
- This project intends to include various features related to an art gallery i.e. information about gallery, exhibition, artists, their paintings, customers (the one who bought the paintings) etc.
- The main aim is to help art lovers know about different exhibition details organized by different organizations, the art work included, the artists. People who wish to buy this art work can very easily contact the artist.
- There is a login page for administrator, artists and customer. Artists can login through their account and include details about new paintings made by them. Customers can login through their account and see different paintings available for selling purpose. Administrator can include details about new art gallery, upcoming exhibition details and the exhibition artists.
